# WarmTouch 22

An interactive multitouch display with built-in PC, based on AOPEN Digital Engine technology. The display is built in an aluminium casing designed to handle the rigors of intense use in a variety of scenarios.

+ IP65 grade dust & waterproof panel
+ Full HD display, with ideal viewing angle for both portrait and landscape orientation
+ All function keys are supported with a security lock, making it the ideal system for public environments

22"
